

# TRACE EYE-D®

**INSTANT DETECTION**  
**ACCURATE RESULTS**

**for Narcotics + Explosives**

# THE CHALLENGE

New Detection Capabilities Needed

## NEED

First responders and public safety providers **need a convenient and effective method of quickly identifying** dangerous or illicit substances.

# OUR SOLUTION

Open. Wipe. Look.

## ABOUT Trace Eye-D

We are developers and manufacturers of patented colorimetric chemical wipe products for instant detection of surface drug and explosives.

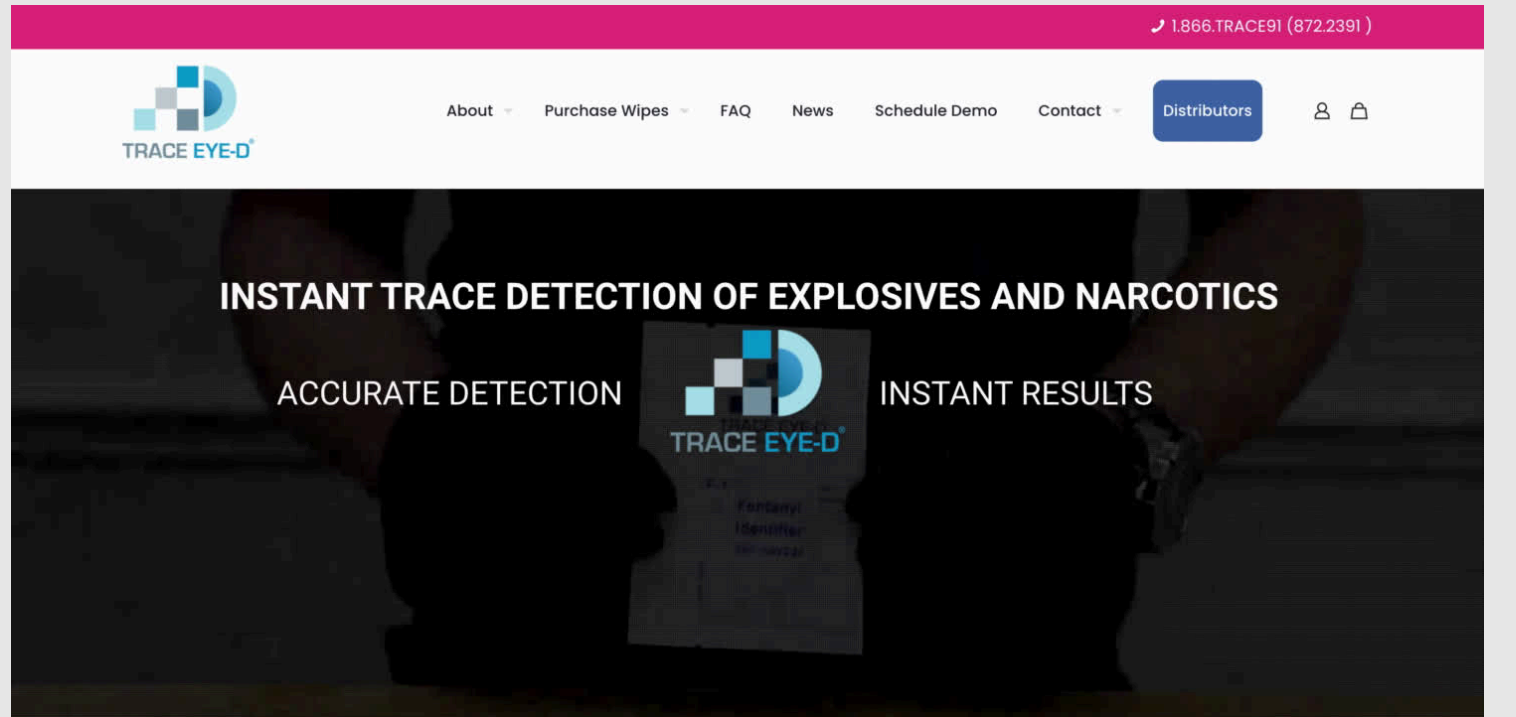

All Trace Eye-D products are manufactured in the USA, using the highest quality industry standards.

**Our goal** is to address growing public and private security and safety needs.

**Our mission** is to make the world a safer place.

Trace Eye-D has invented an innovative line of patented, disposable color-changing wipes that are highly portable and accurate in confirming the presence of suspected explosives or narcotics.

# FEATURES + BENEFITS

**Ease of Use** - As simple as Open Wipe Look. Positive result will match packaging color.

**Safe to Use** - No glass ampoules that could cause injury

**Safe to Use** - F1 Fentanyl Wipe is now approved as safe to use on skin

**Fast results** - Results are instant, no mass quantity required

**Wipes can test many forms** - Powder, pills, liquids, residue, trace, bulk

**Convenience** - Lightweight + compact + durable

**Environmentally Safe** - Can be disposed of in the common waste stream

**Training** - Demo + Q+A sessions for customers

**Training** - Online certificate course to assist in flexible large group / department training for customers

# FENTANYL FACTS +

## Demand For Instant Detection

1

Fentanyl is a powerful synthetic opioid that poses serious health risks, especially through inhalation.

2

A few grains of sand worth of Fentanyl can be lethal.

3

Approximately 35% of patients in rehabilitation centers reported using illicit drugs during their stay

4

Fentanyl exposure poses significant risks to first responders due to its potency and potential for accidental contact.

5

Fentanyl is up to 50x stronger than heroin and 100x stronger than morphine.

6

According to the DOJ Statistics, approx 58% of state prisoners and 63% of sentenced jail inmates in the U.S. meet the criteria for drug dependence or abuse, which means drugs are widespread in our correctional system.

7

Over the past two years seizures of fentanyl powder nearly doubled. DEA seized 13,176 kilograms (29,048 pounds) in 2023. Meanwhile, the more than 79 million fentanyl pills seized by DEA in 2023 is almost triple what was seized in 2021.

8

Narcan is the leading solution to restore breathing after fentanyl poisoning. Trace Eye-D's F1 will become known as the leading prevention tool in avoiding fentanyl poisoning.
